

HEALTH SAFETY AND ENVIRONMENTAL POLICY

Notore is committed to the Health, Safety, Environment and well-being of its employees, contractors, visitors, and host communities at all its business locations.

In our daily activities, we shall endeavour to protect the environment, including the prevention of pollution through the conservation of material resources, efficient energy use, and identification of all environmental aspects.

We shall continually strive to create a sustainable, eco-friendly, and safe work environment, to prevent injury and ill-health by identifying all hazards while ensuring compliance with all relevant national and international health, safety and environmental regulations, standards and other requirements.

To achieve these, we remain committed to eliminating hazards and preventing environmental impacts and other HSE risks by consultation and participation of all interested parties.

We shall review our activities for continual improvement, and promote a culture of health, safety and environmental awareness amongst employees and business partners.
